

KAVYANJALI PARMAR

+91-9027105472 parmarkavyanjali@gmail.com linkedin.com/in/kavyanjali-parmar github.com/kavyanjali Parmar

Professional Summary

- Computer Science(AI&ML) undergraduate with hands-on experience in **machine learning, deep learning, and time-series forecasting**. Worked as a Machine Learning Intern, and gained practical knowledge about models and real world solutions. Built projects including CNN-based facial emotion recognition, Library Management System. Strong foundations in data structures, databases, and system design. National Finalist(Top 25) at DataForge – E-Summit '26, IIT-Roorkee.

Education

Graphic Era Hill University	2023 – Present
<i>B.Tech in Computer Science (AI & ML)</i>	<i>CGPA: 8.48</i>
Welham Girls' School	2023
<i>Indian School Certificate (ISC)</i>	<i>Dehradun, India</i>
Welham Girls' School	2021
<i>Indian Certificate of Secondary Education (ICSE)</i>	<i>Dehradun, India</i>

Technical Skills

Programming Languages: Python, C++, Java
Frameworks & Libraries: NumPy, Pandas, TensorFlow, Keras, Matplotlib, Seaborn, scikit-learn, PyTorch
Databases & APIs: MySQL, SQL, MongoDB, REST APIs
Tools: Git, VS Code, Jupyter Notebook, Google Colab
Coursework: Data Structures, Operating Systems, Database Management Systems
Concepts: Object-Oriented Programming (OOP), System Design, Problem-Solving
Soft Skills: Leadership, Team Collaboration, Communication

Experience

Machine Learning Intern Future Interns	March 2026 – Apr 2026
<i>Remote</i>	

- Worked on real-world machine learning projects focused on business analytics and predictive modelling.
- Developed a sales forecasting model using SARIMAX for time-series analysis on historical retail data.
- Performed data preprocessing, feature engineering, and incorporated exogenous variables to improve model performance.
- Visualized forecast trends to derive actionable business insights.
- Extended work to NLP-based ticket classification and resume screening systems.
- Used Python, Pandas, statsmodels, and Jupyter Notebook for model development and experimentation.
- Maintained project workflows and documentation using GitHub repositories.

Contributor (AI/Agents Track) GirlScript Summer of Code	April 2026 – Present
<i>Open Source</i>	

- Contributing to **AI/agent-based open-source projects** with a focus on automation and NLP.
- Collaborating with developers globally using Git, enhancing teamwork and problem-solving skills.

Projects

Forest Change Detection Google Earth Engine, NDVI	Feb 2026 – Mar 2026
- Developed a satellite-based pipeline using Sentinel-2 imagery dataset for environmental monitoring. - Performed NDVI-based multi-temporal analysis (2020 vs 2024) to identify vegetation regions. - Applied NDVI differencing and thresholding to detect and quantify forest loss (~7.5%). - Visualized spatial patterns of deforestation using Google Earth Engine.	

Facial Emotion Recognition CNN, TensorFlow	Sep 2024 – Nov 2024
- Built a Convolutional Neural Network (CNN) using TensorFlow/Keras for emotion classification. - Trained on 15,000+ labeled images (RAF-DB dataset) with data preprocessing and normalization. - Achieved 80% accuracy across seven emotion classes. - Integrated real-time face detection using Haar Cascade for live predictions.	

Achievements

DataForge (IIT Roorkee) – Top 25	Feb 2026
---	-----------------

- Built a **context-aware AI system** using prompt engineering for efficient information extraction.

Certifications

- Generative AI – Coursera
- AWS Skill Builder – Cloud & ML Fundamentals
